MUHAMMAD UMAIR CHEEMA

Digital Operations • Geospatial Data Annotation • English Customer Support

Punjab, Pakistan (PKT, UTC+5) | +92 314-9669576 (Phone / WhatsApp) | umaircheemapa2@gmail.com
Portfolio: muhammadumaircheema.github.io | LinkedIn: linkedin.com/in/muhammadumaircheema

PROFESSIONAL SUMMARY

Detail-oriented operations professional with hands-on experience across **US/UK lead generation**, **geospatial polygon mapping and spatial data annotation**, and **English live chat customer support**. Currently coordinating a team of Facebook Marketplace listing operators and qualifying inbound service inquiries for US and UK home-service markets. Previously digitized and quality-checked 2D/3D RF coverage polygons at AIRCOD TECHNOLOGIES using AirView and Google Earth Pro. Combines clear written English, structured workflow management, and practical proficiency in Microsoft Office and Google Workspace, supported by a BS in Medical Imaging Technology that reinforces a precise, quality-focused working style.

CORE COMPETENCIES

Lead Generation & Qualification • Digital Listing Management • Marketplace Operations • Team Coordination • Workflow Management • Spatial Data Annotation • Polygon Digitization • Geospatial Quality Assurance • Live Chat Support • International Customer Service • Technical Troubleshooting • Data Tracking in Excel & Google Sheets

PROFESSIONAL EXPERIENCE

Digital Operations & Lead Generation Specialist — Feb 2025 – Present

Independent Digital Services (US/UK Markets) — Remote, Pakistan

- Manage digital service-listing campaigns and localized lead-generation operations on **Facebook Marketplace** for US and UK home-service markets (electrical, plumbing, HVAC, household services).
- Coordinate and supervise a team of **4–6 listing operators**, establishing daily publication targets, monitoring publishing workflows, and maintaining operational consistency.
- Develop and deploy **custom browser automation workflows and extensions** (leveraging AI-assisted tools) to accelerate listing operations and reduce manual data entry.
- Respond to inbound customer inquiries in English and qualify prospective customers according to service requirements, managing **200+ qualified leads monthly**.
- Maintain structured lead-tracking sheets and operational records in **Microsoft Excel** and **Google Sheets** to support follow-up and daily reporting.

GIS & RF Polygon Mapping Specialist — Aug 2024 – Feb 2025

AIRCOD TECHNOLOGIES — Lahore, Pakistan

- Created, digitized, and analyzed geospatial polygons using **AirView** software and **Google Earth Pro** to support RF network planning.
- Delivered high-throughput spatial digitization of up to **1,200+ geospatial polygons daily**, consistently maintaining a **98.5%+ quality assurance (QA) accuracy rate**.
- Produced 2D and 3D polygon mapping utilized by RF engineers for wireless site planning, coverage analysis, and network design.
- Marked, annotated, and verified geospatial information against stringent telecommunications mapping and data quality standards.

Customer Chat Support Specialist — Nov 2023 – Jul 2024

Digital BPO & Client Support Services — Lahore, Pakistan

- Provided English-language customer support to international clients through **live chat**, managing **3–4 concurrent conversations** with an initial response time under **60 seconds**.
- Resolved customer inquiries and technical issues, including account verification and step-by-step troubleshooting.
- Assisted customers with product information and order processing while consistently meeting service-quality standards.

Diagnostic Radiographer – Clinical Placement

Jinnah Hospital — Lahore **Jul 2023 – Oct 2023**

Lahore General Hospital — Lahore **Jan 2023 – Jun 2023**

Supervised clinical placement (internship) completed as part of the BS Medical Imaging Technology programme.

- Assisted senior radiology professionals with CT scan and digital X-ray procedures in hospital clinical environments.
- Followed patient-safety and radiation-protection protocols and maintained clinical documentation and imaging records.

TECHNICAL SKILLS

Digital Operations: Facebook Marketplace operations, Meta Business Suite, digital listing management, US/UK lead generation (200+ leads/mo), lead qualification, account compliance, team coordination (4–6 operators), custom browser automation & extensions

GIS & Geospatial: AirView software, Google Earth Pro, high-throughput spatial data annotation (1,200+ polygons/day, 98.5%+ QA), 2D/3D polygon digitization, RF coverage mapping, geospatial data verification, quality assurance

Customer Support: English live chat support (sub-60s response, 3–4 concurrent chats), international customer service, written communication, technical troubleshooting, inquiry resolution, multitasking

Productivity Software: Microsoft Word, Excel, PowerPoint, Access; Google Workspace (Sheets, Docs, Drive, Forms)

Medical Imaging: CT scan systems, digital radiography, X-ray imaging, image quality control, clinical documentation, patient safety, radiation protection protocols

EDUCATION

Bachelor of Science in Medical Imaging Technology (BS MIT) **2019 – 2023**

Superior University, Lahore, Pakistan

F.Sc. Pre-Medical **2017 – 2019**

Madrassa-Tul-Banaat College, Sadiqabad, Pakistan

Matriculation – Science **2015 – 2017**

Iqra Public High School, Sadiqabad, Pakistan

CONFERENCES & PROFESSIONAL DEVELOPMENT

MICON – 2nd International Medical Imaging Conference **Dec 2024**

Superior University, Lahore

Participated in sessions on artificial intelligence in medical imaging and diagnostic technology.

RASCON-24 – International Rehabilitation and Allied Health Sciences Conference **Mar 2024**

Pearl Continental Hotel, Lahore

Technical Workshops in Diagnostic Imaging **2019 – 2023**

During BS Medical Imaging Technology studies

Hands-on workshops covering diagnostic imaging techniques, image quality control, and operational safety.
